INDEX

abiotrophic fundus lesion, 277
accessory (B) chromosome, 49
A chromosome, order of genes, 267
adaptation of insects, 73
agglutinin, 238
agglutinogen, 399
albinism, 251
albino in *Lebistes*, 252
algae, 151
alleles, 221
allelomorph, 132, 326
allergy, hereditary, 306
allotriploidy, 127
Amphibia, giant cells, 405
anaphase, 79, 108
antibody, 131
  production, 161, 308
antigen antibody reaction, 248
Aranea, 80
  reaumuri, 78
aristopedia allelomorph, 407
arrowhead gene, 63
Asker, A., 404
Auerbach, C., 405

bacteriophage, 181
banana, 101
Bateman, A. J., 277, 349
Beatley, R. A., 405, 406
Begg, C. M., 407
Billingham, E. R., 281
bivalent, 51
body pigmentation, 251
Bonnier, G., 1
Burnet, F. M., 289
Busk, T., 286

Callan, H. G., 406
Calliphora vomitoria, 338
cancer, 283, 285, 286, 287
C antigen, 247
carcinogen, 280
  susceptibility, 284
  virus relation, 282
Carr, J. K., 283, 284
Carter, T. C., 405
ceiling concept, 13
cell heredity, 29
cellular transformation, 44
centrosome, 85
chiricahua gene, 63
chromatid split, 50
chromosome ordinary (A), 60
  accessory (B), 49
  alteration, 120, 155
  associations, 120
  mitotic, 119
  number in *Poa Alpina*, 57
  somatic, 56
Clemmesen, J., 286
CO_2 sensitivity in *Drosophila*, 325
cross absorption of cell sera, 292
cytoplasmic inheritance, 345
  transmission, 154

dairy cattle, 404
Darlington, C. D., 281
Demerec, M., 280
dendritic cells, 30
dermal papilla, 30
diakinesis, 51, 85
diploid hybrid, 101
diplotene, 82
Dmochowski, L., 279
Dodds, K. S., 101
Dreyfus, A., 278
Drosophila, 66, 325
  double mosaic in, 405
  fertility in, 353
  funebris, 69, 338
  marker genes, 355
  mating behaviour, 351
  melanogaster, 65
    female reproductive system, 406
    histiochemical studies, 408
    nutritional requirements, 407
  partial deficiencies, 405
  persimilis, 66
  production of phenocopies, 408
  pseudoobscura, 66
  selection for size, 403
  sensitivity, inheritance of, 331
  sexual isolation, 278
    selection, 277, 349
  simulans, 338
  transmission of sensitivity, 332
drug resistance, 176

enzymatic adaptation, 161
epidermal cell, 30
epithelium of the tongue, 32
equality principle in feeding, 10
Erysiphe polygoni, 267
evolution, physiological, 184

Falconer, D. S., 403
feeding experiments with cattle, 3
  intensity, 10
Fenner, F., 289
fertility gene in wheat, 396
  gametic, 111
  in relation to selection, 353
  of allelomorphs, 199
Finland, 141
Finney, D. J., 199, 369
Fisher, R. A., 271
fixation, chromatic, 102
Frankel, O. H., 391
Fraser, A. S., 391
fraternal twins, 5
Freedman, R., 407
frequency of recessives, 379
fundus lesion, abiotrophic, 277
Fungi, 146

gene actions, kinetics of, 153
  arrangement, 63
  estimation, 201
  for albinism, 257
  frequency, 138, 199
  mutation, 161, 219
  recombination in bacteria, 179
  scoring of, 200
genetics and immunology, 289
  medicine and man, 275
genetic variations, modes of, 152
genoid, 325
genotype, 241
Gottschalk, R. G., 284
graft, auto, 34
  homo, 34
  pinch, 34
Greenwood, A. W., 284

Haddow, A., 282
Hansson, A., 1
Harland, S. C., 263
Haskins, Caryl P., 251
Haurowitz-Mudd theory, 318
heredity changes, 190
Heston, W. E., 279
heterochromasy, 77
heterogamic phenomena, 160
heterokaryosis, 157
heteropycnosis, 86
heterozygosity, 106
heterozygotes, deficiency of, 112
Heuts, M. J., 63
Hogreffe, G., 280
homology between X's, 94
house mouse, 271
human blood groups, 294
humidity influence on Pupæ, 65

identical cattle twins, 3
immunological adaptation, 161
immunology, 289
incompatibility gene, 219
infective cellular transformation, 29, 281
iso-immunisation, 293

Karn, N. W., 287
Kemp, Tage, 285
Koller, P., 286
Korteweg, R., 279

Lawler, S. D., 236
Lebistes reticulatus, 251
Lederberg, J., 145
lepotene, 79
Lerner, I. M., 403
lethal concentration, 328
Lewis, D., 219
leucæmia in mice, 280
Leucopogon juniperinus, 119
L'Héritier, Ph., 325
linear score, 209, 384
linkage group of house mouse, 12th, 271
Little, C. C., 275
longevity experiment, 71

Macdonald, J. M., 408
MacKenzie, H. J., 287
Mævia vittata, 92
Majumdar, D. N., 399
mammary cancer in mice, 279
  gland tumour in mice, 279
  tumour inducing factor, 279
Martin, V. C., 278
maximum likelihood score, 203, 369
Medawar, P. B., 29, 281
meiosis, 49, 77, 120
melanin, 30, 253
  migration, 40
Mendelian inheritance in micro-organisms, 146
Mentha, 116
metabolism, nucleid acid, 77
metaphase, mistimed, 109
mice, selection for size, 403
  new strain of luxate, 405
microbial genetics, 145
micronucleus, 54
mildew, immunity to, 263
  susceptibility to, 263
milk yield, 22
mitosis, 79
molecules in synthesis of Beta-Alanine, 277
molecular coiling, 89
monozygous twins, 1
Montgomery, C., 13
Muller, H. J., 275
Münthzing, A., 49
Musa, 101
mutagenesis, 162
mutagens, 167
mutant characters, 171
  fermentative, 173

mutation, 222
  chemically induced, 283
  induced by carcinogen, 280
  meiotic, 229
  rate, 227
  time of, 228

Neilson, A., 286
Neurospora, 154, 318
nuclei, isolated, 406
nucleoli, 53, 79

Oenothera, 225
  organensis, 227
orthogenesis, 190

paragglutination, 183
parthenocarpic gene, 103
parthenocarpy, 101
particulate basis, 152
Passey, R. D., 283
Pätau, K., 77
Penrose, L. S., 287
Pesola, V. A., 141
phage resistance, 175
phase variation, 178
pigmentary dendritic cells, 30
pigment spread, 30
Pisum sativum, 263
plasmagene theory of cancer origin, 281
pleiotropic action, 221
Poa alpina, 49
polarity of univalent distribution, 125
pollen development, 123
  fertility, 124
  grains, 225
  mitosis, 49
  tube examination, 223
pollination, 223
polyploidy, 158
polysomy, 158
polyspermic fertilisation, 335
population gene frequency, 217, 369
  genetics, 186
poultry, heredity in, 403
Prunus avium, 226

Quadrivalent, 53

Race, R. R., 131, 236
recessive viability, 64
  frequency of, 379
red cell antigen, 300
Reeve, C. R. E., 403
Rendel, J. M., 404
Rh blood groups, 236, 289, 399
Robertson, A., 403, 404
Robertson, F. W., 403
Roper, J. A., 277
Rous sarcoma, 284
Ruakura research station, 3
rusts, 150
rye breeding, 141

Sanger, R., 131, 236
scoring system, 207
seed yield, 103
segregation, polarised, 119
self pollinisation factor, 234
semiapomixis, 127
sensitisation reaction, 291
sex ratio, 404
Simmonds, N. W., 101
Slizynski, B. M., 405
Smithers, D., 287
Smith-White, S., 119
smuts, 150
Snell, G. D., 271
Snyder, L. H., 275
Sorsby, A., 277
speltoid wheat, 391
spermatocyte, 81
Spicer, C. C., 285
spider, 77
spirilisation, 87
Standard gene, 66
statistical treatment of dates, 7
stenospermocarpy, 114
sterility, basal, in wheat, 393
  gametic, 111
Strong, L. C., 280
style length, inheritance of, 278
Styphelia, 123

Tegenaria, 77, 95
temperature, influence of, 328
  cure of sensitivity, 338
terminalisation coefficient, 80
tetrad analysis, 147
Theridium, 80
tissue transplantation, 303
toxic action of CO_2, 328
transformation of pneumococci, 182
transplanted tumours, 280
triploid, stable, 119
trivalent, 51
tumour, susceptibility, 285

univalent, 60
  behaviour of, 111, 120

variance ratio between sexes, 358
viability of Albino, 253
  differential V. of pupæ, 73

Waddington, C. H., 407
Walsh, R. J., 131
Waterhouse, J. A. H., 276
Wheat breeding, 141
Woolf, B., 143

xeroderma, 286
X segregation, 77
XY mechanism, 366

Zea Mays, 220
